DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 18-19 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Mohan (U.S. Patent # 5,499,178).

Mohan discloses claimed invention a power distribution system (figure 7, 11 and 12), including power source, a power bus, a capacitor bank shunt connected to power bus, an active filter shunt connected to power bus (column 15, line 20-65)

3. Claims 1-3, 5, 18-19 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Hosoda (U.S. Patent # 5,047,909) or Mohan et al. (U.S. Patent # 5,548,165).

Hosoda's figure 1-6 discloses claimed subject matters. Similarly Mohan et. Al.'s figure 1D and 2, discloses claimed subject matters (column 2, line 1-30).

4. Claims 1-3, 18-19 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Cook et al. (U.S. Patent # 4,967,334).

Cook et al.'s figure 3-4, discloses the subject matters of the claimed invention (column 5, line 5-25).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

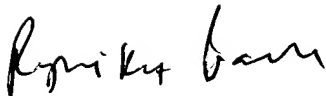

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-17, 20-25 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mohan (U.S. Patent # 5,499,178) in combination with VeNard, II (U.S. Patent # 3,746,963). Mohan discloses claimed invention a power distribution system (figure 7-12), including power source, a power bus, a capacitor bank shunt connected to power bus, an active filter shunt connected to power bus as explained in the claims 1-3, 18-19 and 26, above, except the utilization of the technique for a dc link capacitor to maintain constant and stable voltage. VeNard, II teaches the utilization of the similar technique for a dc link capacitor to maintain constant and stable voltage. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Mohan's power distribution system by utilizing the technique of

VeNard, II teaching for the purpose of providing a hybrid series active, parallel passive, power conditioner for unbalanced load, passive filter and source conditions.
